Task Title:

Assignment 1

Task description:

Making a Web page, which shows company team members according to the design provided.

Steps Taken:

Usage of HTML and CSS to manually code and create a web page and software used for writing the code is vs code.

Challenges Faced:

Basic challenges such as alignment.

Solutions Implemented:

Tried to make the web page can say 80% according to the design. Made the whole process manually. Applied my knowledge and made the page.

Learnings:

In this task, I have started taking the first steps towards the working journey as a developer. Also understood how to apply the knowledge to the fullest and how to analyze the things to create the webpage and quickly implement it in the task.

Project Update:

Hereby I can say that the project is completed by me as per the design.
